VISHAL BAPURAO NAGARE

MANAGER – IT APPLICATIONS | AGENTIC AI & BANKING TECHNOLOGY LEADER

Mumbai, Maharashtra, India | +91-9820948499 | nagarevb007@gmail.com | LinkedIn Profile

PROFESSIONAL SUMMARY

Manager – IT Applications with 7+ years of experience in BFSI/NBFC housing finance technology, combining end-to-end application lifecycle management with hands-on Generative AI and Agentic AI solution engineering. Proven track record designing and deploying Python-based multi-agent AI pipelines (Azure OpenAI/GPT, FastAPI, MySQL, LangSmith) that automate credit review, document validation, and operational reporting, while leading vendor negotiations, stakeholder management, ITGC/IT audits, and UAT governance for mission-critical lending, collections, and insurance platforms. Adept at translating business requirements (BRD/SDLC/Agile) into scalable API-integrated solutions on AWS and Azure, and at optimizing AI workflows for cost, accuracy, and auditability.

CORE SKILLS

- **AI / Agentic Systems:** Generative AI, Agentic AI Architecture & Multi-Agent Orchestration, Microsoft Azure AI Foundry, Azure OpenAI (GPT models), Python, LangSmith, Prompt Engineering, AI Workflow Cost Optimization, MLOps fundamentals
- **Application & Domain Platforms:** Loan Origination System (LOS), LMS, Collections, Insurance, Channel Partner & DSA Onboarding, Contract Lifecycle Management, A3S, FinCharge, Credit Nirvana, WebEngage
- **Cloud, API & Data:** AWS (Lambda, Serverless, API Onboarding), Azure, REST API Integrations, FastAPI, MySQL, PostgreSQL, SQL, Database Testing
- **Governance, Audit & Compliance:** ITGC & ITSM Audits, User Access Review, IT Policy / SOP Design, Dormant ID Management, RCA Documentation, API Governance, Risk & Compliance Reporting
- **Delivery & Management:** SDLC, STLC, Agile/Scrum, BRD Analysis, UAT Coordination, Vendor & Cost Management, Stakeholder Management, JIRA (Org Admin), Project Scope & Budget Planning

PROFESSIONAL EXPERIENCE

Manager – IT Applications
Jun 2023 – Present

Aditya Birla Housing Finance Ltd, Thane, India

- Lead end-to-end application lifecycle management for lending platforms including A3S (LOS), Collections, Insurance, Charge Collection, and FinWise, defining project scope, timelines, budgets, and compliance requirements.
- Designed and built an AI-powered Project Review Note Generation platform using a six-agent orchestration pipeline (FastAPI, MySQL, Azure OpenAI GPT, S3/DMS), cutting manual review-note preparation from 2–3 days to minutes while keeping outputs audit-ready.
- Audited the Fintellect CAM agent pipeline (114 LLM-driven agents) and re-architected deterministic logic into Python, reducing unnecessary LLM calls to under 15 per case and improving reproducibility and cost efficiency.
- Built a deterministic Applicant Name Triangulation engine (Python) replacing an LLM-based prompt across SFDC, PAN, Aadhaar, CIBIL, salary slip, passport, voter ID, and driving licence sources.
- Developed the ABHFL NDC/Docket Bot automation workflow (claim, document fetch/download, OCR validation, callback, reassignment) with local mock and real Tray/Claim API modes.
- Led end-to-end implementation of Credit Nirvana's AI-powered Voice Bot (Maestro Collection Agentic AI) for telecalling across collection buckets (PDM, Charges, X-Bucket), covering vendor commercial negotiation, UAT sign-off, and production go-live; built supporting AWS Lambda integrations including an automated post-call webhook and a scheduler-triggered Promise-to-Pay payment-link generator.
- Implemented FinWise, an AI-powered sales enablement platform (Django, LangChain, Azure OpenAI GPT-4o) using a Retrieval-Augmented Generation (RAG) model over a curated knowledge base to give field sales and channel partners instant conversational access to ABHFL product eligibility, interest rates, policies, and processing details.
- Drove AWS cloud adoption strategy achieving full application migration with enhanced scalability, security, and performance; onboarded APIs to AWS using serverless functions (Lambda).
- Led quarterly Application, ITSM, and ITGC audits from IT; closed 20+ high-priority audit observations across access management, database security, API governance, and process gaps.
- Drafted and implemented SOPs for dormant ID management, access provisioning/de-provisioning, and API review workflows; conducted periodic access reviews and password-policy enforcement.

- Negotiated vendor contracts (including Finverse, Volody, collection systems) achieving measurable cost savings while coordinating UAT sign-off, deployment readiness, and production stability.
- Enabled 5-minute DSA onboarding using an RPA-led platform, transforming partner activation and the home loan journey with industry-leading turnaround efficiency.

Software Engineer
Sep 2021 – Jun 2023

ApMoSys Technologies Pvt. Ltd. (Client: Aditya Birla Housing Finance Ltd), Thane, India

- **Project – A3S Loan Origination System (LOS), 2021–2023:** Validated end-to-end lending workflows on the A3S LOS and LMS through functional, integration, regression, and SQL-based back-end testing; verified API and database behaviour against business and system requirements and supported production release readiness.
- **Project – Toolyt Sales Application, 2021–2023:** Supported the Toolyt sales application for ABHFL, analysing proposed technical solutions against customer requirements, executing functional and integration testing, and delivering unit-tested releases within customer-prescribed timeframes.
- Designed test scenarios and test cases, logged and tracked defects through to closure in JIRA, and ran regression cycles to confirm fixes before production deployment.
- Collaborated with developers, business analysts, and application owners on solution design status and project progress, resolving defects and keeping delivery on schedule.

Test Engineer
Mar 2019 – Sep 2021

PrognosticSoft Solutions Pvt. Ltd., Pune, India

- Maintained test plans, procedures, and defect-tracking documentation for audit and future reference; performed functional, regression, and sanity testing on banking components (RTGS, NEFT, IMPS, LOS).
- Prepared BRDs post requirement analysis and tracked defect lifecycle and root-cause trends across builds.
- Mentored junior engineers and streamlined regression testing procedures, improving defect identification efficiency.

KEY PROJECTS

- **AI Powered Project Review Note Generation:** Agentic AI platform (Hooper front end, FastAPI backend, MySQL, Azure GPT) automating project/borrower review notes for credit decisioning.
- **Fintellect / Finverse CAM & Lead Pipeline:** Led analysis and optimization of AI/ML CAM automation and lead-log classification (KYC, CIBIL, PAN, Payment, Account Aggregator outcomes) for NBFC lending operations.
- **ABHFL NDC / Docket Bot:** End-to-end automation of NDC and docket verification workflow with OCR-based document validation and duplicate-claim prevention.
- **Applicant Name Triangulation Engine:** Deterministic, rules-based Python engine replacing LLM-based identity matching across 8+ KYC document sources.
- **Credit Nirvana AI Voice Bot:** AI-powered telecalling Voice Bot (Maestro Collection Agentic AI) for collections across PDM, Charges, and X-Bucket, with AWS Lambda-based post-call webhook and Promise-to-Pay payment-link automation.
- **FinWise AI Sales Assistant:** RAG-based conversational AI platform (Azure OpenAI GPT-4o, LangChain) delivering real-time ABHFL product knowledge, eligibility, and policy answers to sales teams and channel partners.

EDUCATION

- Master of Business Administration (MBA) – Specialization: Artificial Intelligence & Machine Learning — Dr. D. Y. Patil Vidyapeeth, Centre for Online Learning, Pune (2024–2026)
- Bachelor of Engineering – Mechanical Engineering — Sinhgad Institute of Technology, Pune (2019)

CERTIFICATIONS & TRAINING

- Microsoft Azure AI Foundry – Generative AI & Agentic AI App Development: Completed Microsoft-led hands-on training (AI Proficiency Program, in partnership with Microsoft and CloudThat) covering the Foundry portal, model selection and SDKs, building and testing tool-enabled chat/agent apps, and responsible AI evaluation practices.
